

# Booze or No

## Drink Smart, Stay Safe

Paniz Ziaie, Paya Karimi, Franziska Wojtkowski and Ali Badran

# Our Vision

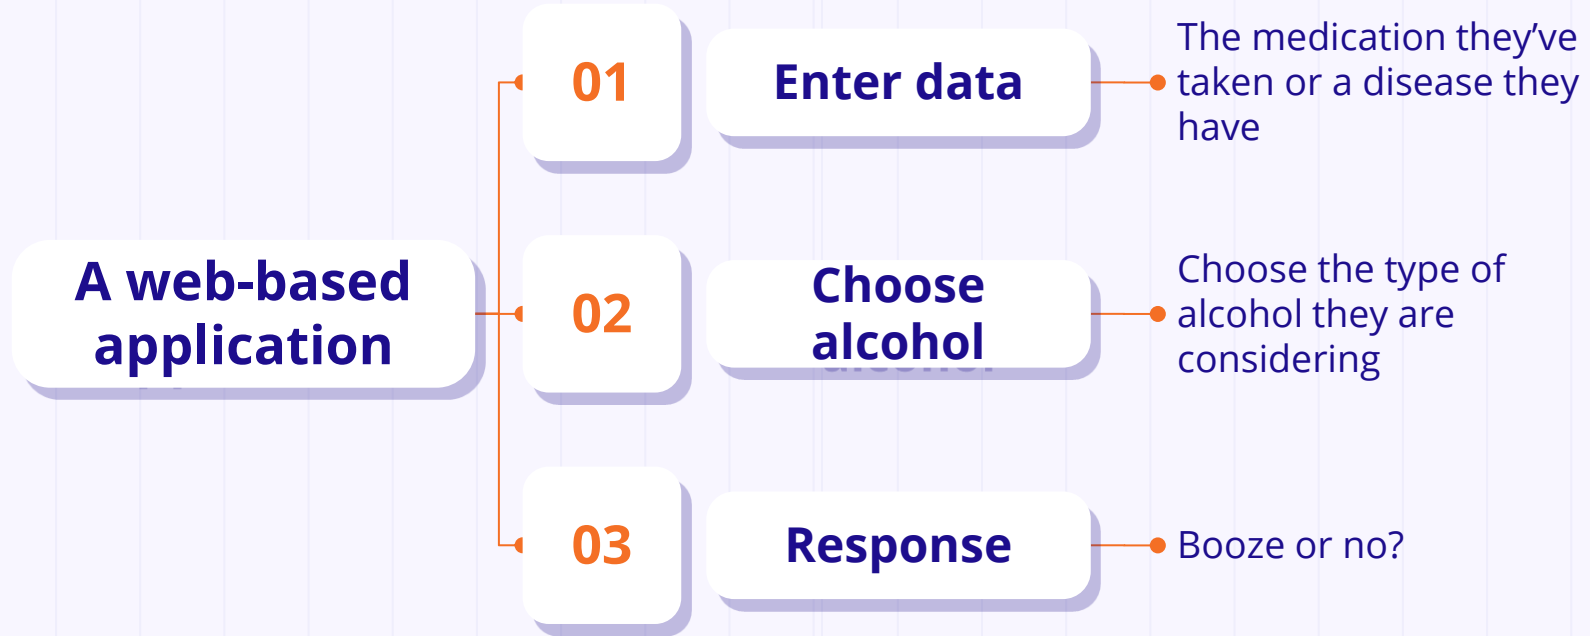

Making informed and responsible choices

# Our Vision

We believe that harm reduction starts with access to clear, personalized information. With “Booz or no?”, we’re offering a **bridge between medical data and everyday life**—not to encourage drinking, but to empower better decisions.

# What we're building

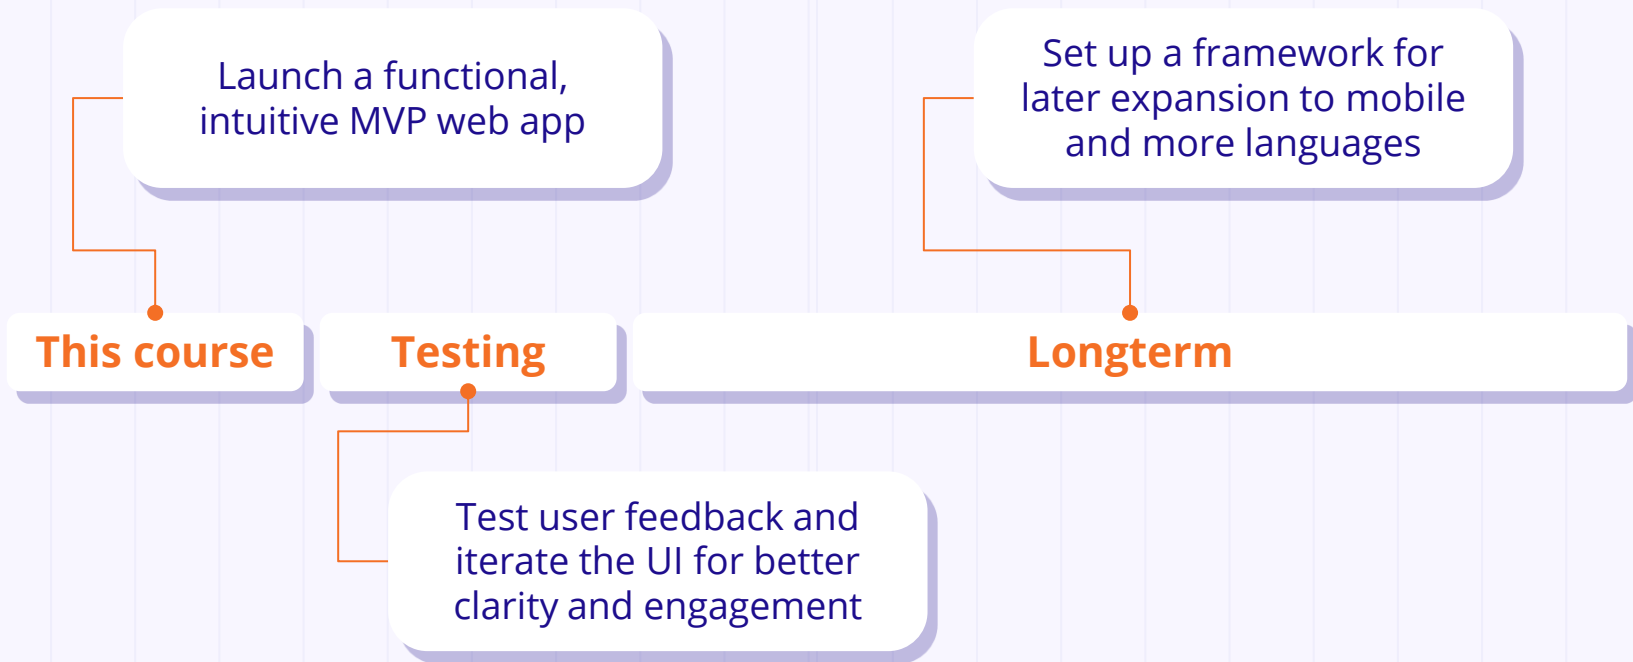

# Why now?

There's a growing awareness around personal health, and yet, **very few people actually know how alcohol interacts with medications**. This information exists, but it's scattered, full of jargon, or buried in long PDF leaflets. We want to surface that data in a **clear, accessible, and even slightly fun** way without compromising accuracy or responsibility.

# Our goals

**“Booz or no?” isn’t just an app—it’s a tool for awareness.**

**Thank you!**
